Ken Kevin Cabanalan

THIRD-YEAR STUDENT DEVELOPER

kenkevincabanalan0@gmail.com | Remote | github.com/cosme0

PROFILE

Third-year student developer with hands-on experience from coursework and personal projects across web, mobile and data-driven systems. Comfortable working with HTML, CSS, JavaScript, C++, C#, Dart, Python, PHP and SQL. Learns by building, publishing projects on GitHub, and turning requirements into working software.

PROJECTS

Flutter Payment App Flutter, Dart, Supabase, Xendit | 2026
Mobile app integrating Supabase as the backend and Xendit for payments, covering UI, data and the payment flow.

Systems Architecture Project PHP, Web | 2026
PHP system built for a systems architecture course, focused on application structure and working core features.

BMC Final Project Flutter, Dart, Mobile | 2026
Final project for a mobile computing course - a complete Flutter application built from the ground up.

AI Data Representation Python, AI, Data | 2026
Coursework activity exploring how data is represented and prepared for artificial intelligence workflows.

Activity Calendar HTML, CSS, JavaScript | 2025
Interactive activity calendar built with plain web technologies, practising layout and date handling.

SKILLS

Languages: HTML, CSS, JavaScript, C++, C#, Dart, Python, PHP, SQL
Frameworks & platforms: Flutter, Supabase, Firebase, Xendit
Tools: Git & GitHub, VS Code, Chrome DevTools

EDUCATION

Bachelor's Degree Third year | [Your University]
Currently in my third year. Replace this line with your exact course, school and expected graduation year.
